

Commands:

just reminder I use linux-ubuntu

```
cd /opt/lampp/bin
```

```
sudo ./mysql -u root -p
```

```
MariaDB [(none)]> CREATE DATABASE webMKM;  
Query OK, 1 row affected (0.001 sec)  
  
MariaDB [(none)]> use webMKM;  
Database changed  
MariaDB [webMKM]> select current_user;  
+-----+  
| current_user |  
+-----+  
| root@localhost |  
+-----+  
1 row in set (0.000 sec)
```

// Xampp uses mariaDB instead of mysql, it's a same thing

Have created table

```
CREATE TABLE users(login varchar(40), password varchar(40));
```

granted permission to user

```
GRANT ALL ON webMKM.* TO adil@localhost IDENTIFIED BY 'jukilo999';
```

After this operations, code is succefully running.
