

// first three tasks are in index.php file

### Task – 1

```
<?php
session_start();
if (!isset($_SESSION['count'])) {
    $_SESSION['count'] = 0;
} else {
    $_SESSION['count']++;
}

if ($_SESSION['count'] == 0) {
    echo "You have not restarted the page\n";
} else {
    echo "You have restarted " . $_SESSION['count'] . " times.\n";
}

?>
```

### Task – 2

```
<form action="" method="post">
    <input type="text" name="NS">
    <select name="country">
        <option value="">(Select a country)</option>
        <option>Kazakhstan</option>
        <option>Usa</option>
        <option>Ukraine</option>
        <option>Japan</option>
        <option>Italy</option>
    </select>
    <input type="submit" name="Submit">
</form>

<?php
if (isset($_POST['Submit'])) {
    $_SESSION['name'] = $_POST['NS'];
    $_SESSION['cntry'] = $_POST['country'];
}

?>
```

### Task – 3

```
<form action="" method="post">
    <input type="text" name="email" placeholder="email">
    <input type="submit" name="Submit2">
</form>

<?php
if (isset($_POST['Submit2'])) {
    $_SESSION['email'] = $_POST['email'];
}

?>

<a href="test.php">test</a>
```

There was a problem: we can't submit input content without pressing or enter, or pressing button submit, that's why I have two submit buttons

### Result:

You have not restarted the page

### Task 4-5

I already made some tasks in previous lab, nevertheless, here we are

```
} else {  
    echo "Welcome!";  
    session_start();  
    $_SESSION['logged'] = true;  
    $_SESSION['username'] = $user;  
    date_default_timezone_set('Asia/Omsk');  
    $_SESSION['time'] = time();  
  
    header("location: home.php");  
}
```

I've added this part(above) to login & register pages.  
Also, have created home.php file:

```
1 <?php
2     session_start();
3     echo $_SESSION['username'] . 'is logged <br>';
4     echo "Login time: " . date('d/m/Y h:i:s', $_SESSION['time']) . '<br>';
5     echo "Logged " . time() - $_SESSION['time'] . " seconds ago<br>"
6 ?>
7
8 <a href="logout.php">Logout</a>
```

Link to logout will destroy sessions, as in previous labs.
